

CS 6014 TRACK OVERVIEW

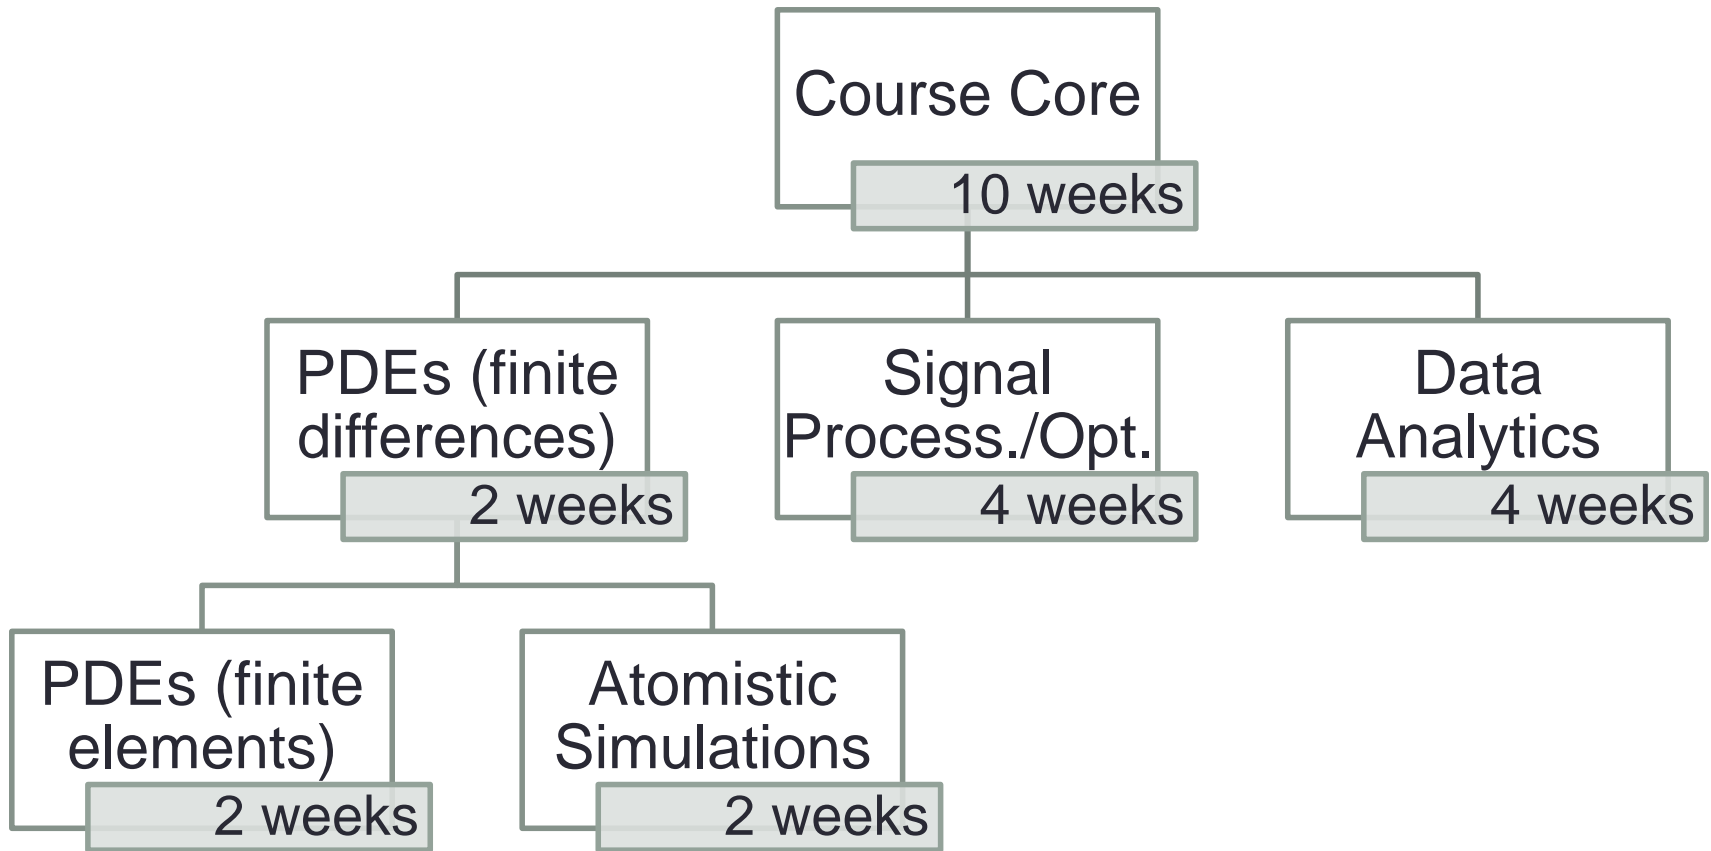

14 Jan. 2013

UVACSE

The University of Virginia Alliance for
Computational Science & Engineering

Proposed Tracks

Partial Differential Equations (finite differences)

- Instructor
 - Dr. Katherine Holcomb
- Languages supported
 - Any
- Offered
 - First two weeks of April

Partial Differential Equations (finite elements)

- Instructor
 - Dr. Katherine Holcomb
- Languages supported
 - Any
- Offered
 - Last two weeks of April

Atomistic Simulation (kinetic Monte Carlo)

- Instructor
 - Dr. Matt Neurock
- Languages supported
 - Fortran, Python
- Offered
 - Last two weeks of April

Signal Processing/Optimization

- Instructor
 - Dr. Ed Hall
- Languages supported
 - Matlab, Python
- Offered
 - All four weeks of April

Data Analytics

- Instructor
 - Dr. Jackie Huband
- Languages supported
 - Any
- Offered
 - All four weeks of April
